$WILDTOKEN:

CRYPTO

MOVEMENT FOR

WILDLIFE

CONSERVATION

White Paper V1- Aug 2025

Prepared by: Sean

1.0. Executive Summary:

WILDToken is a community driven meme powered cryptocurrency with a real mission. Which is funding wildlife conservation efforts on a global scale. By combining the virality of meme culture with transparent blockchain mechanics, WILDToken creates a self-sustaining ecosystem where every transaction contributes to saving endangered species, protecting natural habitats and supporting grassroots conservation NGOs. Through tax on transfer donations, DAO governance, NFT campaigns and founder transparency, WILDToken turns profits into purpose, while offering holders rewards, utility and upside.

2.0. Problem Statement:

2.1. Underfunded Conservation

According to the UN and WWF, there is a **$20–30 billion annual shortfall** in funding needed to protect the planet's biodiversity. This has contributed to a 69% average decline in wildlife populations since 1970.

2.2. Donation Fatigue

Traditional charity models are outdated:

- Donors lack **transparency** and trust.

- Funds may be lost in **admin costs**, corruption, or delayed disbursement.

- There is **no engagement or ownership** after donating.

- Younger generations want **decentralized, transparent, and tech-native tools** to make a difference.

2.3. **Limited Scalability**

Many NGOs have amazing boots-on-the-ground impact but struggle with:

- Limited digital infrastructure

- Dependency on unstable grants

- Inability to reach global donors

3. Our Solution

WILD introduces a **tokenized, blockchain-based solution** that enables donors, investors, and conservationists to collaborate transparently.

3.1. Blockchain-Powered Conservation

Funds are stored and disbursed via smart contracts with **on-chain transparency**, reducing fraud, delays, or mismanagement.

3.2. Community Voting

Token holders vote on which projects receive funding, giving them **direct influence** on real-world conservation outcomes.

3.3. Gamified Engagement

Earn exclusive NFTs, rewards, and status for supporting causes. ReFi becomes **fun, social, and meaningful**.
3.4. Conservation Vault

40% of all WILD tokens are locked in a vault dedicated to funding environmental initiatives over time. DAO governance ensures democratic, periodic disbursement.

3.5. NGO Onboarding Framework

We create a streamlined system for NGOs to apply, be vetted, and receive funding. Each project must commit to reporting **on-chain milestones and metrics**.

4.0 Tokenomics

WILDToken Allocation Breakdown

5. Token Utility

WILD isn't just a funding token. It's a **participation token**—with real-world and in-platform utility:

- **Project Funding**: Stake or vote to determine which conservation efforts are funded quarterly.

- **Staking Rewards**: Earn yield for locking tokens and participating in governance.

- **NFT Access**: Redeem special NFTs tied to real-world conservation milestones (e.g., "Sponsor a tiger", "Save a coral reef").

- **E-commerce Integration**: Use WILD to buy eco-products, merch, or access virtual events.

- **Governance Participation**: Propose, discuss, and vote on protocol changes or new features.

6. Governance and Transparency

WILD operates as a **Decentralized Autonomous Organization (DAO)**.

6.1. DAO Framework

Holders can:

- Propose which NGOs to onboard

- Approve project milestones and fund release

- Vote on changes to vault distribution, roadmap, or partnerships

6.2. Transparency Tools

- **Multi-sig wallets** with trusted community signers

- Regular **public reports** from funded NGOs

- Use of **blockchain oracles** to verify real-world impact (via partners like Chainlink)

7. Conservation Partners

We onboard conservation groups with:

- Proven track records

- Strong local partnerships

- Ability to deliver measurable impact

7.1. Vetting Criteria

- Nonprofit or mission-aligned social enterprise

- Strong governance, financial transparency

- Measurable KPIs (e.g., number of animals saved, hectares rewilded)

- Willing to use WILD dashboard & reporting tools

7.2. Example Use Cases

- **Kenya:** Support for anti-poaching patrols and rhino sanctuaries

- **Malaysia:** Mangrove restoration and pangolin rescue

- **Amazon:** Indigenous-led reforestation and biodiversity surveys

- **Oceans:** Coral reef mapping and restoration using AI drones

8. Legal & Compliance

WILD operates with full transparency and in accordance with:

- **AML/KYC regulations** for public token sale

- Token is **utility-classified**, not a security

- Based in [jurisdiction TBD], with registration of a **nonprofit conservation trust**

- NGO partners must comply with due diligence requirements, fund-use audits, and public reporting

9. Call to Action

WILD is more than a token—it's a call to act.

"We are the first generation to fully understand the damage we're doing—and the last that can do something about it." — Sir David Attenborough

By investing in WILD, you're not only joining a crypto project—you're becoming part of a decentralized movement to restore the Earth.

Invest in purpose, Track your impact, Protect wildlife, together
